

Little tools and software I have found to make my job easier

Fences:

Desktop organisation software

<http://www.stardock.com/products/fences/>

Cost: USD\$9.99

Trello

Is an easy, free, flexible, and visual way to manage your projects and organise anything

<https://trello.com/>

Cost: Free. Business class and enterprise versions available

Snagit

Screen capture and screen recording software. Gives you the complete tool for screen capture and video recording on Windows and Mac. Combine traditional screenshots, video recording, image editing, and file sharing. It is fast and easy to visually explain anything on your screen.

<https://www.techsmith.com/screen-capture.html>

Cost: USD \$49.95

Your Browser is

Checking your customer's web browser maker, version and settings

<https://yourbrowser.is/en/>

Cost: Most of the features and almost all detections are available free. A Pro account provides more customisations, feedback collecting features and connection speed measuring.

Flash Renamer

Batch file rename utility for files, photos and mp3s.

<http://www.rlvision.com/flashren/about.php>

Cost: Shareware

DownThemAll!

Is a download manager/accelerator. It features an advanced accelerator that increases speed up to 4x and it allows you to pause and resume downloads at any time.

Firefox add-on - <https://addons.mozilla.org/en-us/firefox/addon/downthemall/>

ExamDiff:

Tool for visual file and directory comparison

https://www.prestosoft.com/edp_examdiff.asp

Cost: Freeware. ExamDiff Pro USD\$34.99

HttpFox

Monitors and analyses all incoming and outgoing HTTP traffic between the browser and the web servers. It aims to bring the functionality known from tools like HttpWatch or IEInspector to the Firefox browser.

Firefox add-on - <https://addons.mozilla.org/en-us/firefox/addon/httpfox/>
